DETAILED ACTION

Allowable Subject Matter

Claims 14 – 39 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Claims 14, 27, 32 and 36:

The Examiner agrees with Applicant's remarks that Mourant et al. does not show a combined broadside and edge coupling in a single embodiment. Mourant et al. shows either broadside coupling (Fig. 2A, AA, B) or edge coupling (Figs. 7-9) denoted by art-recognized coupling symbol K but not both edge and broadside coupling (claims 14, 32); where Mourant et al. does not show four transmission lines with respective interconnects (claim 27); or where a linear distance along the respective conductors between adjacent pairs of interconnects is less than 30 degrees of an operating frequency (claim 36).

Gutierrez shows a semi-conductor package and while teaching coupling of the upper conductor (17) with the lower conductor (16) forming a transformer (col. 3, lines 30-35), but Gutierrez is silent with respect to the transformer also having edge coupling. Gutierrez shows the upper conductors are formed on the same layer and a lower conductor are formed on a layer, but in a different layer than the first conductors, where the Applicant forms the first conductor on different layers and the second conductor on different layers (claims 14, 32); where Gutierrez does not show four conductors (claim

27); or where a linear distance along the respective conductors between adjacent pairs of interconnects is less than 30 degrees of an operating frequency (claim 36).
